Dilon 6800 Gamma Camera Receives CE Mark

(Newport News, Virginia: June 09, 2008)—Dilon Technologies announced today that it has received CE Mark (Conformité Européenne) approval for the commercial sale of the Dilon 6800 Gamma Camera in European Union member countries. The Dilon system is a high resolution gamma camera that enables molecular imaging of the breast and other small organs for early cancer detection.

"I am delighted that our high technology camera will now also be available to customers in Europe and other parts of the world that require the CE mark. The body of clinical evidence related to our camera's performance and ability to detect tumors continues to mount, and I am very pleased that medical professionals around the world will now also be able to avail themselves of this technology. Given the large international market potential for our camera, I am very excited about our company's future growth prospects," said Robert Moussa, Chairman and CEO.

About Dilon Technologies

Dilon Technologies is bringing innovative new medical imaging products to market. Dilon's cornerstone product, the Dilon 6800, is a high-resolution, small field-of-view gamma camera, optimized to perform Breast-Specific Gamma Imaging (BSGI), a molecular breast imaging procedure which images the metabolic activity of breast lesions through radiotracer uptake. Many leading medical centers around the country are now offering BSGI to their patients, including: Cornell University Medical Center, New York; George Washington University Medical Center, Washington, D.C.; Northwestern Memorial Hospital, Chicago; and The Rose, Houston.
